

## DISRUPT MOSQUITO CONTROL IN YOUR AREA

### THE OPPORTUNITY:

Join the fight against mosquito-borne diseases and grow a thriving business with a Senecio Robotics' turn-key solution utilising the gold standard of mosquito control – the Sterile Insect Technique (SIT).

With a Senecio SIT Hub you can offer a safe, sustainable, and highly effective solution to combat mosquito-borne diseases in your territory.

### START A SENECIO SIT HUB

#### WHY SIT?

##### EFFECTIVE:

Sterilised male mosquitoes are released in large numbers to mate with wild females, thus preventing the eggs from hatching and significantly reducing local mosquito populations within weeks.

##### ENVIRONMENTAL:

Unlike chemical insecticides, SIT targets only specific mosquito species and is harmless to all other species and the environment.

#### WHY SENECIO?

##### PROVEN TECHNOLOGY:

Senecio provides a an automated, AI-powered production line for sterile male mosquitoes. This eliminates the labour-intensive and expensive bottlenecks of traditional SIT methods.

##### LEADING SOLUTION:

Become a leader in your area by introducing this groundbreaking technology. Senecio's licence program equips you with the technology and expertise to establish a high-end solution for mosquito control.

##### QUICK DEPLOYMENT:

Start your SIT business by next season!

#### YOU GET:

##### TURNKEY PRODUCTION LINE:

Senecio provides a complete mosquito breeding, separation, sterilising and packaging system, ensuring efficient and reliable operation.

##### COMPREHENSIVE TRAINING:

Our team of experts will train your staff on all aspects of operating the production line and implementing best practices.

##### ONGOING SUPPORT:

We'll guide you in planning, logistics, regulatory compliance and how to establish successful partnerships with local authorities and pest control companies.

## BUSINESS BENEFITS:

##### HIGH DEMAND:

Mosquito control business growing 19.7% YoY with increasing demand for natural solutions.

##### DISRUPTIVE TECHNOLOGY:

Senecio's AI-powered SIT offers unmatched effectiveness and scalability compared to traditional methods.

##### RECURRING REVENUE:

Sell to municipalities, pest control companies, schools, hotels, parks, neighborhood associations and mosquito control districts.

##### PATENTED:

Strong IP portfolio protects entrepreneurs.

##### SCALABLE:

As demand grows, you can easily expand your operation with additional Senecio production line modules.

##### BIGGER MALES – BETTER BUSINESS:

We generate better quality SIT males, resulting in reduced operational costs and higher gross margins.

##### UNIQUE OFFERING:

Join Senecio's growing network and become a leader in innovative mosquito control solutions.

# PROVEN RESULTS AND COMMERCIAL VIABILITY

Senecio SIT HUB's are deployed on the ground, demonstrating exceptional effectiveness in reducing mosquito populations and the associated risks of disease transmission. With a remarkable 90% satisfaction rate among our clients, we are proud of the positive impact we've made.

## START SELLING BY NEXT SEASON!

Unlike other SIT solutions, Senecio offers a commercially viable model that generates a strong return on investment. Our technology is accessible, and you can begin producing and selling sterile mosquitoes within the next season of setting up your Senecio SIT HUB.

## UPGRADE YOUR SERVICE, UPSCALE YOUR MARKET

### SIT HUB FACTS:

Non GMO, no chemicals, **100% natural**

Floor area: **450 m<sup>2</sup> /5000 sq ft**

Mosquitoes/week: **5M per module**

Staff: **≤ 4 people per 5M/wk**

Coverage area: **Up to 20 sq  
mi/50 km per module**

Dispersing rate: **Up to 100 drop sites per technician/day**

Requires licensed technician: **No**

Ave. residential subscription fee: **100-150 USD/month**

**Up to 5,000 clients/module**
